

Scientific Meeting

Hydrological research in Norway 2011 -new results from PhD- and MSc-projects

Oslo, CIENS, 24th October 2011

The Norwegian Hydrological Council (NHR) would like to follow up its annual tradition of inviting to a meeting on hydrological research. We invite PhD- and MSc-students to present results from their work.

Research within the subject of hydrology engages PhD- and MSc-students at many universities and colleges. NHR would like to use this meeting as an opportunity to create a forum where students can introduce and discuss their work and share knowledge among themselves and more senior hydrologists. It will also be of interest to future employers to get a good overview of what is on the agenda within hydrological research right now.

Presentations

PhD- og MSc-students are invited to give oral presentations of 20 minutes, or poster presentations of 5-10 minutes and/ or display their posters. **An extended abstract of about 1 page can be submitted to nhr@nve.no within 15th September 2011.** NHR will distribute prizes of NOK 2500,- for the best oral and poster presentations.

Fee / Registration

Ordinary participants, including lunch: NOK 500,- **Students free** (also need to register). **Please submit your registration to: nhr@nve.no within 5th October 2011.**

Invoices will be distributed after the registration. NHR will cover the travel costs (low-cost) for students that give presentations and do not live in Oslo.
